INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/JP2005/003253

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1-18	YES
	Claims		NO
Inventive step (IS)	Claims		YES
	Claims	1-18	NO
Industrial applicability (IA)	Claims	1-18	YES
	Claims		NO

2. Citations and explanations(Rule 70.7)

D1: JP 11-296327 A (HEWLETT-PACKARD CO.) 1999.10.29

D2: JP 5-327748 A (FUJITSU LTD.) 1993.12.10

D3: JP 2003-308194 A (CANON INC.) 2003.10.31

[Claims 1-18]

In the written reply, the applicant argues that the invention of the present application is different from D1 and D2 in that the invention uses no IC card while an IC card is necessary in both D1 and D2.

In the field of cryptography, it is a well-known technique to generate an encryption key from a password (without an IC card). And the target of encryption by said encryption key is a matter of design variation. Since, D2 discloses the idea of encrypting the session key by key-encrypting-key generated from a password, the skilled person in the art would easily conceive the idea of employing said encryption key generated from a password as a key which is used to encrypt the session key in D1. Because no public key cryptosystem is used in these processes, no IC card is necessary.

Therefore, the subject matter of claims 1-18 does not involve an inventive step in the view of the documents D1, D2, D3 cited in the ISR.
